Safety & quality approach

Project planning addresses hazards, access, sequencing, and contract-required plans. Quality coordination covers submittals, inspections, testing, and corrective actions. Closeout coordination covers punch lists, commissioning, training, as-builts, and warranties.

Verify current SBA program status, SAM entity information, and size eligibility for the assigned NAICS during acquisition planning. Competitive and sole-source approaches depend on applicable SBA and agency procedures. Published NAICS list is from RLC company capability records.
